

ONEIR SOLUTIONS

ONEIR SOLUTIONS FOR WHOLESALE DISTRIBUTION

As a Wholesale Distribution business, you are dealing with a wide range of clientele and professionals in your industry. You want to keep your business clients satisfied by expediting their orders with efficiency and in a timely manner. As a supplier to their bustling retail businesses, you want to ensure you are delivering the best in quality, service and reliability.

How can Oneir Solutions help my Wholesale Distribution business?

You need to have tight control over inventory, sales and customers to maintain your efficiency and ensure your success in the business to business market. Even your "on-the-road" sales reps can have immediate access when making remote sales!

Categorize your customers by type (i.e. contractors, retailers) and control discounts, price breaks and target promotions and campaigns towards a specific group. Generate orders based on the customer's sales history, track customer balances, control credit limits and "hold" orders for customers with overdue balances.

You will have a handle on what stock is not moving and what items need to be in your warehouse at all times. Track items purchased by each customer and the specifications of these items, such as dye lot, colour, type, etc.

Easily interface with the e-Commerce web store. Sales reps on the road can place orders directly from their customer's location, email confirmation to the customer and have the pick slip printed at the warehouse for picking, packing and shipping. "Drop-in" customer ordering can also be accommodated

Features & Benefits for Wholesale Distribution

Oneir Solutions Pricing

Rent to purchase as low as \$350/month*
